

DELL HARDWARE SERVICE

If your new hardware ever requires service, please contact the Dell Technical Support Team at (866) 516-3115. Please have your service tag number ready when you call for service. Your service tag number identifies you as an UAN client, and will ensure that you receive the premium level of support and next-day repair or replacement service. If you have a Dell desktop, the service tag number is affixed on the side of the CPU. If you have a Dell laptop, the service tag number is affixed on the top of the laptop.
