DATE: April 14, 2014
SUBJECT: 2014.3 Overview

2014.3 is a mandatory update for **all** UAN users.

PAYROLL

Salary Wage Adjustment Issue

UAN has discovered a very rare payroll issue that may occur when a *wage adjustment* is posted for a *salary earning with multiple account codes* in 2014 using UAN Version 2014.1 or 2014.2. You would NOT have this issue if you have *not* posted any wage adjustments for a salary earning with multiple account codes in fiscal year 2014.

The Version 2014.3 install will check for the issue, as well as prevent the issue from occurring in the future. *If the issue IS detected, you will be instructed to contact UAN for further assistance.*

Note: Version 2014.3 will not check 2013 data for this issue. We have scanned all received 2013 year-end annual financial submissions and did not find the issue in any of the submitted data.

GENERAL

Performance Improvements

Version 2014.3 contains a preliminary series of financial calculation enhancements that improve performance in various areas of the software. For larger UAN entities, this means the speed and responsiveness of some areas such as Withholding Payments will be *significantly* increased.

2013 Prior Year Reports (Reminder!)

Prior year reports created in the new software are accessible **WITHIN** the software by simply changing the Year selection at the top left corner of any report area. NO ICONS are available in UAN Tools > Prior Year Reports on your desktop for prior year reports from the new software.

Note: Selections on the Filters or Options tabs may need to be changed for 2013 to be available.
